

## **Camp Verde Wastewater Treatment Facility** *General Contractor*

This project consists of the construction of a new 0.65 mgpd wastewater treatment plant to replace the old lagoon treatment system. The project included the installation of a force main to the new headworks system, a wastewater treatment plant package from Aero-Mod, a septage receiving system, a plant water system, and sludge dewatering equipment.

The project was delayed during construction due to an engineering design error by the structural engineer hired by the owner. Increase in contract price is due to additions to the contract scope and associated with the delay.

**Owner:** Camp Verde Sanitary District  
**Engineer:** Coo Van Loo  
**Role:** General Contractor  
**Contract Amount:** \$8,078,050  
**Final Contract Amount:** \$9,051,386  
**Project Start Date:** July 2007  
**Project Completion Date:** December 2009

**Fann Environmental Key Personnel:**  
Jeff Sawyer - Project Manager & Estimator  
Robert Upton - Project Engineer  
Gary Steinmetz - Superintendent
