

Arizona State Parks - Slide Rock WWTP and Restrooms *Design Build*

This Design Build project is currently in the construction phase. FE was selected as the Design Builder from an extensive list of state and national firms using the PIPS process. FE teamed with Engineering and Environmental Consultants, Inc. to perform the wastewater treatment plant civil design work. Summit Controls, LLC, completed electrical design, and FE completed the architectural design services. The project includes a 15,000 gpd Kubota Membrane wastewater treatment plant, effluent holding pond, influent and effluent pump stations, remodel of an existing restroom, and construction of a new restroom and maintenance building. FE is responsible for all aspects of design and construction.

Owner: Arizona State Parks, 602-542-6942

Role: Design Builder

Design Engineer: Engineering & Environmental Consultants, Inc.

Architect: Fann Environmental

Contract Amount: \$1,700,000
